CLA/CLT

The CLA and CLT classes present students with mid-level technical competencies for higher-skilled, frontline material handling and distribution workers in all supply chain facilities, including factories, warehouses, distribution centers, and transporters. The curriculum provides entry-level skills for global supply chain logistics, materials handling, safety principles, quality control, teamwork, communications, and continuing with mid-level skills to include product receiving, storage inventory control, dispatching, and tracking operations. Class delivery consists of a virtual platform with E-learning modules, and each course requires 30 contact hours. CLA certification is a prerequisite to the CLT certification.

CPT

This course is designed to provide students with an industry-recognized, nationally validated certification for frontline production workers in advanced manufacturing. The Certified Production Technician (CPT) training covers the core skills and knowledge for production jobs in advanced manufacturing sectors. The CPT course includes four assessments: Safety, Quality, Maintenance Awareness, and Manufacturing Processes and Production. Each area is addressed with a separate assessment and certification. Individuals who earn the four certificates will receive the CPT credential. Class delivery includes a virtual platform with E-learning modules for a total of 138 contact hours.
